**DETAILED ACTION**

Claims 37-50 are currently presented and have been examined.

***Response to Arguments***

Applicant's arguments with respect to claims 37-50 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 37-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 37-50 recite "storing unacknowledged messages in the message store until corresponding ones of the plurality of embedded devices can accept the unacknowledged messages". It is unclear as to what element within the claim does not acknowledge the messages. It is also not clear as to how the router can know when the embedded devices are able or unable to accept the unacknowledged messages in order to facilitate the storing of unacknowledged messages. It is also unclear what the router does

with the message when the corresponding ones of the plurality of embedded devices can accept the unacknowledged messages.

Claims 37-50 also recite "an acknowledgment of receipt of the message". It is unclear what element provides this acknowledgment.

Claims 37-50 recite a "database lookup". It is unclear which element contains such a database for lookup of the destination address.
